School Curriculum

- All teachers have a curriculum folder containing the long-term plans for all year groups in school in all subjects.
- From these, the teachers complete medium term plans and weekly plans.
- All plans are saved on the shared drive, enabling all teachers to have access to all plans.
- We use RWI to teach phonics.
- Maths is based around the White Rose Maths resources.

Class Dojo

- We use a free online system called 'Class Dojo', in line with our behaviour policy, to share positive and negative behaviours with parents. The children collect dojo points for positive behaviours (including learning behaviours), which they can spend at the Poplar Dojo Shop.
- Class Dojo also has the facility for parents and teachers to send messages to one another, and for parents to upload photos and videos directly to the class teacher using a 'portfolio'.
- 100% of our parents have access to Class Dojo, and all accounts have been activated.
- During lockdown, parents and teachers used this system with ease to share work and receive completed work from home.

Area to consider	Actions
How do we know if the children are completing the work?	- Teachers will be able to view completed work on Class Dojo. - If a parent has not shared work with the teacher, the teacher will send a message to the parent, and a follow up phone call if required.
How do we see completed work?	Parents can upload photos or videos of completed work directly to their class teachers using a portfolio on Class Dojo.
How can we provide feedback?	- Teachers can send messages, photos or videos of feedback using Class Dojo. - Whole class messages etc can be sent, as well as private messages to individual parents.
How does the learning fit with our curriculum?	- Lessons sent remotely to parents will be in line with the curriculum overview. - Links to appropriate 'Oak Academy' lessons will also be shared with parents.
How many lessons will be provided each day?	4 lessons will be provided every day, including English and maths. - Lessons will be updated on Class Dojo daily. - Teachers will send challenges to be completed on Numbots or TTRockstars.
How do we ensure children have the resources they need for remote learning?	- Children have their own stationery set in school, which can be used at home for distance learning. - If a bubble closes during the day and children are sent home during the school day, paper / work books will be sent home with the children. - If a bubble closes before children are in school, paper / work books will be left in the foyer, and parents will be able to sign to say they have been collected. - In an emergency situation (isolation, so can't leave the house) paper / work books will be posted through the letter box at home.
